REPAY Joins the Symitar Vendor Integration Program

September 10, 2019

– VIP enables REPAY to integrate with Symitar –

ATLANTA--(BUSINESS WIRE)--Sep. 10, 2019-- Repay Holdings Corporation, (NASDAQ: RPAY) (“REPAY”) a leading provider of vertically-integrated payment solutions, today announced that it has joined the Symitar® Vendor Integration Program (VIP). Participation in the program will provide REPAY with access to Symitar’s technical resources to enable REPAY’s proprietary payment platform to integrate with Symitar’s Episys® platform. The Vendor Integration Program is designed to help ensure that Symitar’s customers can easily deploy third-party products.

REPAY’s payment platform integrates with Episys via SymXchange™, a services-based programming interface that enables third-party vendors and credit unions to access the platform’s core data and business rules. The integrity of data is maintained throughout any data exchange, because access to business rules and data is managed through a service layer which governs these interactions.

REPAY’s payment technology aims to help credit unions reduce the complexity of electronic payments, increase member satisfaction, and enhance the member experience by offering convenient and secure payment options. The REPAY platform provides access to credit/debit card processing, Instant Funding, ACH processing, IVR/phone pay, text pay, electronic bill payment and presentment (EBPP) systems, and white-labeled member-facing payment portals, including web portals and mobile apps. REPAY’s inclusion in the VIP will make it easier for Symitar’s customers to use these advanced payment technology solutions to seamlessly accept payments and automatically update member payment data.

“Competition for new customers is fierce in the world of lending,” said Susan Perlmutter, Chief Revenue Officer of REPAY. “Having a multitude of friendly, self-service payment options for members, as well as state of the art collection tools that are integrated to their core platform, can be a game changer for a credit union. REPAY’s technology integration to the Episys platform can be a quick resolution to close this gap for our credit union clients.”

Symitar’s VIP takes the customer out of the middle, providing vendors with direct access to Symitar’s technical resources and test systems. VIP inclusion is not an endorsement of the vendor’s product.
